

# Working Method & Client Brief

Every project begins with a review of the room's function, feeling, and your vision.

The purpose is to create a shared direction for the design process, whether you want to be involved in the details or hand over the whole process to me.

## We identify:

- Storage and space optimization
  - Layout and improved flow
  - Lighting
  - Room function
- Value increase before a sale
- Increased comfort and visual cohesion
- Adaptation to your life situation (family, working from home, renting out)
  - Well-considered and durable materials
  - A personal and clear identity in the room

*From vision to reality*
